Re: Annual Progress Reports; Sahara Mine, ACT/015/026; Repete
Mine, ACT/037/038; Hillside Mine, ACT/037/015; Straight Creek
Mine, ACT/017/018

Dear Mr. Smith:

Pursuant to previous understanding and past reporting methods, this letter is submitted in lieu of MR Form 3, and conveys to you that none of these operations were active during 1983. No production or reclamation has occurred at the Sahara, Repete or Straight Creek Mines since the filing of the last annual reports. No production has occurred at the Hillside Mine in 1983, but some interim reclamation work was done as a condition of an additional two year suspension period.

As your office is aware, Energy Fuels Nuclear has relinquished all rights to the Hillside Mine to Monticello Mining and Minerals. We have informed Monticello Mining and Minerals that in order for Energy Fuels Nuclear to be released from the bonding requirements, they must assume responsibility or we will proceed with the final reclamation work including permanent closure of the mine portal and reclamation of the mine access roads and dumps. We are currently waiting for reply from Monticello Mining and Minerals.

Please contact me if you need additional information.

Very truly yours,

H. R. Roberts
Senior Project Engineer
